HydroLink[™]
Watering System

DEEP CYCLE BATTERIES NEED WATER
1. To avoid spillage, battery **MUST** be fully charged before watering
2. Check Liquid Level Indicator at least every two weeks
Black color = battery has water
White color = battery needs water

HydroLink[™] Watering System

Battery Watering Made Easy

Trojan Battery now offers the **HydroLink™ Watering System**, a truly innovative solution that focuses on faster, easier and safer battery watering.

As the leading manufacturer of deep-cycle golf car batteries, Trojan knows the importance of battery maintenance and the impact it has on your battery's life. Battery maintenance, particularly watering your battery, can be time-consuming, messy and, in some instances, unsafe.

That is why Trojan Battery has developed HydroLink™ – Battery Watering Made Easy.

The HydroLink™ Watering System offers key features and benefits, not available in the golf market today:

Pre-installed on your Trojan Batteries

HydroLink™ is available pre-installed on Trojan golf car batteries, removing the guess work on proper installation for customers. With one simple snap of a single connection from the watering tube into each HydroLink™, the system is ready for use.

Independent Water Level Indicator

Trojan's HydroLink™ comes with an independent, non-mechanical water level indicator that is simple to read. A white indicator means that the battery needs water and a black indicator means that the battery has enough water. The HydroLink™ indicator will not give a false reading, unlike products that utilize mechanical readers.

Snake™ Tubing

The new durable Snake™ tubing offers the quickest, simplest installation. The patent pending, one-piece Snake™ tubing eliminates the need for multiple connections, resulting in fewer parts and faster filling.

Safety

HydroLink™ comes with both internal and external flame arrestors making it the safest watering system available today. Our dual flame arrestors prevent any spark or flame from entering your Trojan battery. It also eliminates acid exposure while filling the batteries.

Low Profile Design

HydroLink™ will easily fit into any existing or new electric golf car and its low profile reduces the opportunity for damage to the watering system itself. It also eliminates potential interference with other components.

Guaranteed

HydroLink™ is tested and guaranteed to work with your Trojan batteries and comes with a 4-year limited warranty.

Compatibility

The HydroLink™ Watering System is compatible with all 6-volt, 8-volt and 12-volt Trojan golf car batteries, and the Snake™ tubing is pre-assembled to fit the most popular electric golf car configurations, including Club Car, E-Z-Go and Yamaha.

It now takes seconds to achieve the maximum performance and long life you need from your batteries with Trojan's HydroLink™ - Battery Watering Made Easy.

HydroLink™ Makes Financial Sense

Trojan's HydroLink™ saves valuable time and money, with a complete set of batteries filled in less than 30 seconds. It provides even greater value by maximizing your battery's life and performance.

How much will you save?

To determine your annual cost savings you will need to know:

1. The number of golf cars being maintained
2. Hourly labor rate of the person maintaining the golf car

Then follow these 7 easy steps: *(The example below uses 50 golf cars and an hourly labor rate of \$8)*

Cost for One Golf Car	Manual Watering Cost	HydroLink™ Watering Cost
Step 1:		
Weekly Watering Time	20 minutes*	1 minute*
Step 2:		
Labor Cost per Watering (____ min/60 x ____ \$/hour)	\$2.66	\$0.13
Step 3:		
52 Weeks per Year (Step 2 x 52)	\$138.32	\$6.76
Step 4:		
Annual Cleaning of Batteries (Add to Step 3)	\$6.00*	\$0.00
Step 5: Sub-total	\$144.32	\$6.76
Step 6:		
List Price of HydroLink™ Watering System		\$170
Step 7:		
Four Year Comparison for One Car (Step 5 x 4 years + Step 6)	\$577.28	\$197.04
<p>Annual Cost Savings for Typical Fleet of 50 Golf Cars = (\$577.28 – \$197.04) x 50 cars = \$19,012 Four Year Fleet Savings</p>		

*Watering and annual cleaning cost based on industry average per golf car

So whether you are filling one golf car or 50, Trojan's HydroLink™ saves you money and provides faster, easier and safer battery watering.

Trojan offers outstanding technical support provided by full-time application engineers. The Trojan HydroLink™ Watering System is available worldwide through our Master Distributor Network.
