

# 12 Volt Battery Energisers

## 12V BATTERY UNITS

- Optimised power consumption thanks to energy-saving mode
- Deep discharge protection with 12V operation
- Microprocessor controlled
- Solar option possible
- Produced in line with the latest EU safety standards
- Including fence and ground connection cable and warning sign

### ESB 7500

**PROFESSIONAL**

Extremely powerful fence device for 12 volt battery operation an all-round device for demanding applications

- Extremely powerful 12 volt battery unit (5 joule output energy) for rechargeable 12 volt batteries
- Can be used with medium to heavy vegetative growth
- Ideal for horses, cattle, sheep, goats and deterring wild animals
- With High/Low/OFF switch for 2 different-strength outputs

recommended solar module: item no. 375401 (45 watts)

#### Included:

- 1 x fence unit
- 1 x fence connector cable
- 1 x ground connector cable

Spare lead set available: E269150

Multi-colour LED bar graph display (10 LEDs) to monitor the fence status – includes battery-operated warning LED

Ref. no.			£*
481375	1/3	90	

### ESB 2000

**PROFESSIONAL**

Powerful 12 volt fence device for mobile use

- For robust animals such as sheep and longer fences with some vegetation
- With battery condition control (red LED flashes, when battery reaches about 40% of its remaining capacity)
- Fence line indicator LED
- Crocodile clips made from high-quality stainless steel
- With On/Off switch
- Optimised power consumption thanks to energy-saving mode
- Deep discharge protection with 12V operation
- Microprocessor controlled
- Solar option possible
- Produced in line with the latest EU safety standards

#### Included:

- 1 x ground rod
- 1 x fence and ground connection cable

Spare lead set available: E269150

Recommended solar module: 375151
